160 - 195 cm: Modell 185

180 - 210 cm: Modell 205

Introducing our V20 Premium Survival Suit:

Constructed with flame-retardant, tear-resistant orange nylon on the outside and a yellow neoprene inner layer. The outer fabric retains its structure even when wet, with triple bonding and waterproof stitching. The suit features an attached hood and gloves, face flap for added insulation, reflective tape on multiple areas, a signal whistle, strobe light attachment point, and a Buddy Line with a stainless steel carabiner. Each suit is pressure-tested individually. Made from 5.0 mm self-extinguishing neoprene for optimal insulation in moderate water temperatures, meeting all SOLAS standards. The suit includes a foam-filled cushion for buoyancy and a robust attachment line. It can be used without a life jacket.
