- Buddyline included

Available Sizes:

145 - 175 cm: **Model 165**

160 - 195 cm: **Model 185**

180 - 210 cm: **Model 205**

Introducing our survival suit **V20 ECO**, all suit seams are triple-glued and sewn to ensure watertightness, and each suit undergoes a pressure test three times the required value to guarantee long-term durability. The fixed 3-finger gloves prevent water ingress and the Rubber SEY zipper is water-tight and durable even under heavy conditions, requiring minimal force to open and close. The suit provides high buoyancy and is constructed with hardly flammable, tear-proof nylon in an eye-catching orange. The hood and gloves are attached for additional insulation, and reflective tape is present on the arms, legs, breast, and head. A signaling whistle, attachment point for a strobe light, pocket, and buddy line complete the package. The suit can be used without a lifejacket, making it perfect for medium water temperatures. The foam-filled pillow adds buoyancy for additional safety. Trust our survival suit to keep you protected in the most challenging conditions.
